Terms Clarification

Domain – Website address for your website. Example of a domain is www.yourbusiness.com where yourbusiness will be your desire name from available list.

SEO – SEO stands for Search Engine Optimization. It is a series of work to make your website appear on Google's first page.

Disk Space – The amount of storage available for your website. We provide unlimited disk space for all of our packages.

Bandwidth – The amount of traffic available per month. For example, if bandwidth is limited to 1GB/month and if you get huge traffic within a month and overcome 1GB limit, your website won't be able to open the rest of the month. We provide unlimited bandwidth for customers not to encounter this problem.

Google Location Map – We put a mark on Google maps at where your business exists and display it on your website. From this, your customer can easily get your business address, ph number, bus stop, route to drive and find out nearby well-known locations.

Visitor Statistics Account – Real-time total number of visitors to your website and their detail information including visited time, country, referred website and so on. If they found your website on Google, you can see the keyword the used in Google.

Social Integration (Any) – If you already have social pages (Facebook, Twitter, Google+, LinkedIn ...), we link those pages on your website. If you don't have a social page, we create for your for free and link it on your website so that visitors can easy like and share your website and pages.

No. of Pages – Total number of pages you are eligible. The page which is longer than a legal paper size is count as 2 pages.

Web Mail – web mail is the email account with your domain name. For example, since **gmail.com** provides free email services, anybody can create an email address ending with **@gmail.com** whereas since your domain is your own, no one can create an email ending with **@yourdomain.com** but you. (e.g. info@myanmarwebdesigner.com is one of Myanmar Web Designer's web mails)

CMS Integration – CMS is the shorten form of Content Management System. By buying the package with CMS, you are able to manage the content (images, text, layout...) on your website by yourself.

Website Training –A video recorded training course for website owners to manage the content on their website.

Responsive Design – A multi devices (including computers, tablets, mobiles, etc...) compatible design. This system automatically adjusts the layout of your website depending on the device of its visitor.

Web Design Customization – Unlimited design customization for our client. Basic package doesn't include this feature an thus, client has to choose one from our design proposals.

Website Optimization – Optimizing your website for better performance mainly for better speed. It does not meaning that if you don't buy this service, you website will be slow but if you buy this service, your website will be faster than your competitor websites. People are happy to read content of a fast websites. Therefore, it makes your website visitors more engaging and thus more sales.

Enquiry or Contact Form – A form on website via this people can send you message to your email by filling their detail and message. A basic form is a form that contain only input field to write. Dropdown selections, check boxes are only eligible in standard form.

Special SEO– In this service, you will be able to choose your desire keywords. We will make sure your website to come up on Google's first page when people search with those keywords.

Advertising on MWD Page – This is the service to advertise your brand, website and services on our MWD official Facebook Page.

Free Update Service – Total number of times per year we update your website content (text and image) for free. If your website is integrated with CMS you can modify or update unlimited times by yourself.
